

V International Scientific Geological Conference

“**ATYRAUGEO-2019**”

Atyrau, May 23-24, 2019

*Dedicated to
the 120th anniversary of the Kazakh oil production and
the 10th anniversary of the Kazakh Association of Petroleum Geologists*

*Exploration of shallow oil-and gas bearing formations in
Kazakhstan*

Purpose and focus area of the conference:

The main purpose of the conference is to create a uniform professional platform for the review and discussion of the most important topical issues, ideas and tasks of the geological industry, sharing of scientific knowledge and achievements. The guidelines of the conference include the review and discussion of new trends of prospecting, study of new opportunities, technologies and methods of search for oil and gas accumulations; assessment of possibilities for extraction of unrecovered oil in mature fields and assessment of prospectivity of non-anticlinal traps; outlooks for discovery of new oil and gas fields in petroleum basins in Kazakhstan; real possibilities of digitization of oil and gas exploration and challenges of alternative search for raw hydrocarbons in Kazakhstan.

Information letter

Welcome to Kazakhstan

Dear colleagues!

On behalf of the International Organizing Committee, I have the honor to welcome you to the city of Atyrau – the oil capital of Kazakhstan and encourage you to attend the fifth International Scientific Geological Conference “AtyrauGeo-2019” organized by the Kazakh Association of Petroleum Geologists with the support from the Ministry of Energy of the Republic of Kazakhstan, the Committee of Geology and Subsurface Use, KAZENERGY Association and NC KazMunayGas which will be held in Atyrau on May 23-24, 2019.

This year marks the **120th anniversary of the Kazakh oil production**. This significant event will be celebrated in different regions in Kazakhstan.

The beginning of the oil production history in Kazakhstan is considered to be November 1899 when the concession of the Emba-Caspian society drilled 21 wells in Karashungul with depths varying from 38 to 275 meters and one of them produced light oil at the depth of 40 meters. Since then a great number of oil fields has been discovered both onshore and in the Caspian offshore areas and this credit goes primarily to petroleum geologists. The Republic of Kazakhstan possesses now enormous hydrocarbons-in-place and is one of the main oil suppliers to the world market. This is vitally important for the development of the national economy.

A second high-profile event is **the 10th anniversary of the Kazakh Association of Petroleum Geologists**. In celebration of this remarkable date the Kazakh Association of Petroleum Geologists decided to publish a book spotlighting the people who initiated the creation of the Association, the beginning of the way, the day-to-day activity of the Association, its functions, purposes and objectives, development and achievements, activities and major events organized by the Association itself or with its participation, the work and achievements of modern geology, the best professional geologists decorated by the state and the industry and singled out for particular praise and recognition for their work and contribution to the progress of the geological industry in Kazakhstan. The **AtyrauGeo-2019** conference is dedicated to these important events in the oil industry of Kazakhstan.

The purpose of the conference is to create a platform for geologists from different countries for meeting and discussion of the latest scientific achievements and sharing of experience. The AtyrauGeo-2019 conference will provide its participants with the opportunity to discuss the key new trends of prospecting for oil and gas, investigate the problems of extraction of unrecovered oil and assess the real possibilities of its extraction, review the outlooks for discovery of oil and gas fields in new petroleum basins in Kazakhstan and identify challenges of alternative search for raw hydrocarbons.

Plenary and panel sessions and the round table will be held and a selling exhibition of scientific and technical books on oil and gas geology will be organized during the conference.

Looking forward to meeting you at AtyrauGeo-2019!

Chairman of the Organizing Committee

Baltabek Mukhanovich Kuandykov

President of the Kazakh Association of Petroleum Geologists

Date and place of the “AtyrauGeo-2019” conference

The Vth international scientific geological conference “AtyrauGeo-2019” organized by the Kazakh Association of Petroleum Geologists will be held on May 23-24, 2019 in Atyrau.

Conference venue

The conference will be held at Renaissance Hotel Atyrau - one of the best hotels in Atyrau, located in the center of the city at the address: Satpayev street, 15 B, tel : 90-96-29.

Key dates:

Official announcement of the conference – **October 2018**

Circulation of the information letter and invitations – **March-April 2019**

Start of registration, collection of abstracts and papers – **1 March 2019**

Deadline for abstracts – **1 May 2019**

Deadline for papers/articles – **17 May 2019**

Closing date of registration and acceptance of non-cash payments – **17 May 2019**

Notification of authors on the inclusion in the conference program, posting of a preliminary program of speeches on the web-site – **17 May 2019**

Completion of finalizing the conference program – **20 May 2019**

ATYRAUGEO-2019
Atyrau, May 23-24, 2019

***“Exploration of shallow oil –and- gas bearing formations in
Kazakhstan”***

The subject of the plenary session: The outlooks for development of shallow oil and gas fields and discovery of new oil and gas accumulations in Kazakhstan.

Topics of panel sessions:

1. The pre-salt sequence of the Precaspian basin: new trends for search, new opportunities (technologies and methods) for the assessment of trap prospectivity.
2. Search for oil and gas accumulations around the known fields in the South Turgay basin - a promising area of priority.
3. Mangystau region – new opportunities for discovery of oil and gas fields and accumulations.
4. Enormous resources of unrecovered oil in mature fields: assessment of possibilities for development, new ideas, methods, innovative technologies.
5. Exploration in zones of non-anticlinal traps - a proven reserve for new discoveries.
6. Underexplored new oil-and-gas-bearing regions of Kazakhstan: potential for discovery of oil and gas fields.
7. Enhanced oil recovery in shallow fields in Kazakhstan: recent experience, new methods, innovative technologies.
8. Digitalization of hydrocarbon exploration: hopes, possibilities, real outlooks.
9. Challenges of alternative search for raw hydrocarbons in Kazakhstan: shale oil, shale gas, “unconventional deep-seated traps”, etc.
10. Geochemical premises for discovery of hydrocarbon accumulations in the Mesozoic deposits in Kazakhstan.

Note: The conference program is currently being prepared and will be circulated later. The final program of the conference will be posted on the website on May 17, 2019. The speakers are kindly requested to send their abstracts and papers and contact on all issues relating to abstract/paper requests, their execution, etc. by e-mail to info@kong.kz or gkulumbetova@meridian-petroleum.kz

Important! Official working languages of the “AtyrauGeo-2019” scientific conference will be Kazakh, Russian and English. Simultaneous interpretation will be provided at the conference.

Recommendations for preparation of abstracts and papers

The Organizing Committee for the International Scientific Conference "AtyrauGeo-2019" is planning to record the conference abstracts on the flash storage media and put them into the delegate bags before the Conference. For this purpose, all speakers are requested to fill a Request for abstract (please see below) and forward it and the abstract to the Organizing Committee by e-mail info@ongk.kz or gkulumbetova@meridian-petroleum.kz till **May 01st, 2019**. Authors will be notified beforehand of inclusion of their abstracts in the Conference program. The abstracts should concern one of scientific themes of the Conference. The Organizing Committee reserves the right to refer the scientific abstract to any specified theme, break-out or plenary session as well as reviewing of the presented abstracts. Publication of abstracts is not planned.

If the provided abstracts are not in line with the theme of conference, are not executed properly or not delivered in the specified time, the Organizing Committee has a right to exclude these abstracts from the conference.
